- 2.3 Use discretion with learners answers. They must give their opinion and support it with sound, logical reasons that show application of knowledge and that are applicable to the scenario.

Sample answer

No I do not think Jennifer is coping at all because she is spending too much time after hours at work trying to get her own work done. \checkmark She is micro managing her team leaders who do not need to be micromanaged. \checkmark She is also spending far too much time sending emails and checking up on leaders and their staff which is stopping them from getting their work done and frustrating them. \checkmark Her job is to set goals and targets for the team leaders and motivate them to get the job done. \checkmark She must set the vision and goals for the entire department that is in line with the strategic vision of the business. \checkmark \checkmark

2.4 Use discretion with learners answers. They must suggest a management style and then support this with valid and logical reasons.

Note: The scenario implies an autocratic type management style as she does not leave the leaders alone to get on with their work. A democratic management style would suit this scenario as her team leaders have been doing the work for longer than she has been their manager. However, if the learners suggest a permissive style, they will need to give valid reasons that are applicable to the scenario. They must give ten facts written in full sentences.
