TIP

NINE TIMES TABLE

To help you learn the nine times table quickly try this trick. Hold both your hands in front of you. If you need to give the answer to 9×2 , bend your second finger from the left. Count the finger to the left of the bent finger. One! Count all the fingers to the right of your bent finger. Eight! Put those two figures together. One and eight gives you eighteen. The bent finger indicates the number to be multiplied by nine. So for three bend your third finger, which gives you two and seven for 27.

2nd finger

$$2 \times 9 = 18$$
